

# FM16 FRICTION MODIFIER ENGINE LUBRICANT

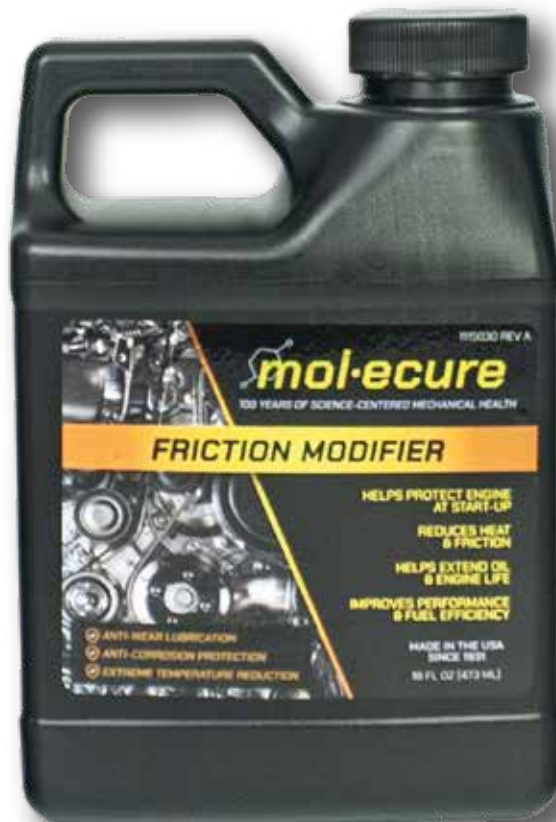

## PRODUCT OVERVIEW

AGS-Molecule Friction Modifier Engine Lubricant is an advanced, easy-to-use engine oil additive designed to be added at any time to your preferred motor oil.

With a powerful formula engineered using cutting-edge boundary lubrication technology, extreme pressure agents, and anti-wear molecules, AGS-Molecule enhances engine protection at a very low treat rate.

Regular use helps reduce friction, lower operating temperatures, and minimize heat buildup. Using also improves startup lubrication and supports the removal of stiction, specifically in diesel engines.

Contains no chlorinated paraffins!

**FM16**  
**Friction Modifier**  
**Engine Lubricant**

## KEY FEATURES & BENEFITS

- Improves gas & diesel fuel economy
- Reduces engine noise
- Compatible with all engines & engine oil
- Reduces sludge & varnish deposits
- Helps extend drain intervals
- Reduces HEUI injector stiction
