

CR12 CATALYTIC RESTORE EMISSION TREATMENT

PRODUCT OVERVIEW

AGS-Molecule Catalytic Restore Emission Treatment is a powerful, highly concentrated formula designed to reduce carbon buildup and help restore the performance of your vehicle's catalytic converter, oxygen sensors, and emissions system.

Safe for use in all Gasoline and Hybrid engines—including fuel-injected and turbocharged systems—this treatment is ideal before emissions testing or when experiencing signs of sluggish performance, increased fuel consumption, or diagnostic trouble codes such as P0420.

Regular use helps extend catalytic converter life, improve engine efficiency, and support optimal emissions performance while helping to reduce hydrocarbon emissions.

SUGGESTED USE & COMPATIBILITY

- Recommended for all gasoline engine types
- Use every 3,000 miles to maintain optimal performance
- Safe for fuel-injected, direct-injected, & carbureted systems
- Treats one full tank of gas (up to 20 gallons)

Emissions Treatment

KEY FEATURES & BENEFITS

- Helps pass emissions smog test
- Cleans & improves catalytic system
- Helps remove OBD codes
- Capless tank compatible
- Deodorizes smelly exhaust
- Works on fuel injected, direct injected, carbureted, turbo, GTDI, Ecotec®, & EcoBoost® engines
